👉 Trends in Education
 📖 Stories of New Education
 🔑 Key events of the trend

This map has been created as a part of Global Education Futures initiative, prepared by Re-Engineering Futures Group. This map is a result of five years of work that brought hundreds of Russian and international experts into co-creative vision building for the future of education. The maps represents key trends driving the transformation of educational systems, and the forecast of events and technologies that will make significant impact on the future education. In the context of this project, education is understood as a multitude of institutions that support training, nurturing, professional and personal development throughout human life – including kindergartens, schools, colleges, universities, and other types of educational institutes.

Authors: Pavel Luksha and Dmitry Peskov
 The following people contributed to preparing the Report texts: Maxim Alamyashev, Aleksei Guzeev, Denis Korochin, Catherine Luksha, Tatiana Makarova, Timur Shchoukine, Ivan Smagin, Ivan Stolyarov, Dmitry Sudakov, and others

Co-authors of material used in the report: moderators and session participants of Education foresight at EdCamp 2010, Foresight Scandinavia 2012, Foresight Fleet 2013, Competence Foresight 2012-14, Global Education Foresight 2013-14, Foresight NewWeb 2013-14
 Design: Morka.ru
